

THE JBR MARKETPLACE

13

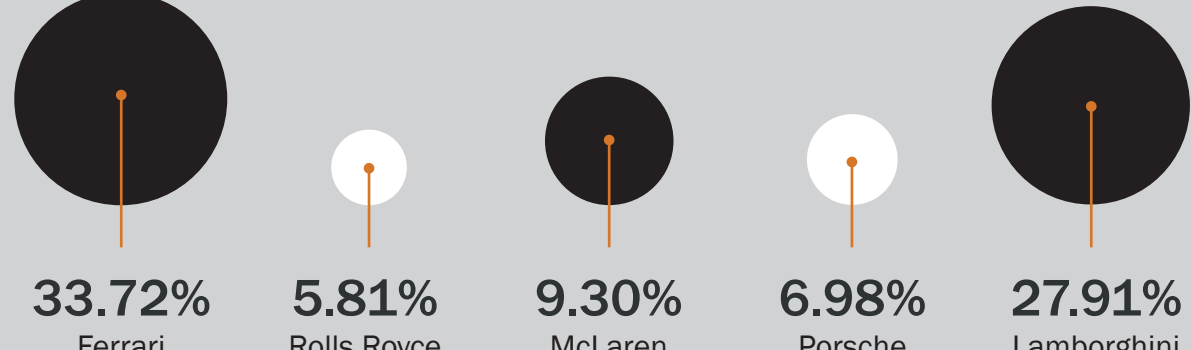

Average age of vehicles financed (years)

High-end vehicle financier and direct lender, JBR Capital, has had a record-breaking year and its best yet since the London-based company's inception in 2015. July 2019 was JBR Capital's busiest month ever for pay-outs, particularly as the upward trend in equity release continues. Celebrating yet another key company milestone, of £500 million in pay-outs over the last five years, the JBR500 virtual garage was launched in October to showcase a selection of the most interesting and historically significant cars funded to-date by JBR Capital.
